BOOK SYNOPSIS

Shaping the Future with Math, Science, and Technology examines how ingenuity, creativity, and teamwork skills are part of an intellectual toolbox associated with math, science, and technology. The book provides new ideas, proven processes, practical tools, and examples useful to educators who want to encourage students to solve problems and express themselves in imaginative ways. The development of a technological knowledge-based economy depends on the development of educational systems that allow schools, teachers, and students of diverse capabilities, backgrounds and learning preferences do better with both content and imaginative problem solving. This book makes the case that it is, indeed, possible to educate our way to a better economy and a better future. Paying attention to 21st century approaches and skills can help accomplish those goals.
