BOOK SYNOPSIS

There are areas of science that are off limits to the public and are not taught in our universities. The science and technology of anti-gravity and extracting energy from space itself was developed in the late 19th and early 20th century by scientists and experimenters like John Worrell Keely, Nicola Tesla, and Thomas Townsend Brown. But today, this science is purposely overlooked and regulated to the world of "Black Projects." The publicly acknowledged space program is but a "smoke screen" to hide a secret space program, overseen by NSA, the CIA and a secret branch of the U.N., that is so secret that even some U.S. Presidents and Congressional oversight committees are not even aware of it. Secret Science and the Secret Space Program will document and provide an in depth look at this secret science and technology and the secret space program that has already colonized Mars, built bases on our Moon and other planets moons and given us the ability to travel to the stars. "Black" science is so far ahead of acknowledged science that this book will seem like science fiction to many who read it.
