BOOK SYNOPSIS

ALERT: Before you purchase, check with your instructor or review your course syllabus to ensure that you select the correct ISBN. Several versions of Pearsons MyLab & Mastering products exist for each title, including customized versions for individual schools, and registrations are not transferable. In addition, you may need a CourseID, provided by your instructor, to register for and use Pearsons MyLab & Mastering products. Packages Access codes for Pearsons MyLab & Mastering products may not be included when purchasing or renting from companies other than Pearson; check with the seller before completing your purchase. Used or rental books If you rent or purchase a used book with an access code, the access code may have been redeemed previously and you may have to purchase a new access code. Access codes Access codes that are purchased from sellers other than Pearson carry a higher risk of being either the wrong ISBN or a previously redeemed code. Check with the seller prior to purchase. Technical Communication Today was written for introduction to technical communication or technical writing courses taught most often in English Departments. Technical Communication Today remains the only text to fully centralize the computer in the technical workplace, presenting how writers use computers throughout their communication process. Writers use their computers to help them think, research, compose, design, and edit. Not only is Technical Communication Today firmly rooted in core rhetorical principles, but the text also presents computers as thinking tools that powerfully influence how we develop, produce, design, and deliver technical documents and presentations. Technical Communication Today speaks to todays students and how they expect to learn information. Instructional narrative is "chunked," so that readable portions of text are combined with graphics. This presentation facilitate learning, and models the way todays technical documents should be designed. Additionally, the chunked presentation integrates an awareness of how documents are read--often "raided" by readers seeking the information they need. By mirroring these processes in its content and structure, Technical Communication Today offers readers a higher level of accessibility.
